REUSE AND REDUCE MATH

Luke introduces the concept of reuse to help to avoid unnecessary buys or waste. When we reuse, we are increasing the amount of times we use a product. This concept is similar to addition. Can you solve these addition math problems?

$12 + 5 = \underline{\quad}$

$3 + 15 = \underline{\quad}$

$3 + 8 = \underline{\quad}$

$14 + 2 = \underline{\quad}$

$7 + 4 = \underline{\quad}$

$8 + 7 = \underline{\quad}$

$11 + 9 = \underline{\quad}$

$3 + 12 = \underline{\quad}$

$6 + 11 = \underline{\quad}$

$10 + 8 = \underline{\quad}$

$5 + 13 = \underline{\quad}$

$9 + 9 = \underline{\quad}$

$13 + 2 = \underline{\quad}$

$6 + 9 = \underline{\quad}$

$3 + 16 = \underline{\quad}$

When we reduce our usage of something, we use less of it. This is similar to subtraction. Can you solve these subtraction math problems?

$12 - 1 = \underline{\quad}$

$13 - 8 = \underline{\quad}$

$16 - 5 = \underline{\quad}$

$18 - 5 = \underline{\quad}$

$17 - 6 = \underline{\quad}$

$14 - 8 = \underline{\quad}$

$19 - 3 = \underline{\quad}$

$11 - 8 = \underline{\quad}$

$20 - 6 = \underline{\quad}$

$17 - 9 = \underline{\quad}$

$19 - 5 = \underline{\quad}$

$13 - 5 = \underline{\quad}$

$15 - 4 = \underline{\quad}$

$12 - 9 = \underline{\quad}$

$16 - 7 = \underline{\quad}$
